

## NSF OPERATIONS ENGINEERING PROGRAM'S FUTURE DIRECTIONS – SUPPLY CHAIN SYSTEMS

**When:** Tuesday, April 9<sup>th</sup>, 11am-12pm

**Where:** Groseclose 402

**Abstract:** The presentation will outline the Supply Chain/Logistics systems context for discussion at the NSF Operations Engineering (OE) Program Workshop to be held 29-31 March 2019 in Dallas and to set the stage for discussions on future directions regarding societal impact and the interface of OR/MS/Analytics with human behavior and organizational behavior/change. The goal of the workshop is to bring together OE Program grantees, researchers, and practitioners in an effort to identify challenges and opportunities for the OE research community and promising future research directions with significant impact on theory and practice.

**Speaker:** Chelsea C. White III

Chelsea C. White III is the Schneider National Chair in Transportation and Logistics and Professor in the H. Milton Stewart School of Industrial and Systems Engineering at Georgia Tech. His most recent research interests include analyzing the role of real-time information and enabling information technology for improved logistics and, more generally, supply chain productivity and risk mitigation, with special focus on the U.S. trucking industry.
