

## **Energize | A Summer Experience for High School Students**

This six-week program is designed for high school juniors and seniors within driving distance of Georgia Tech that are interested in engineering and math. Selected participants will gain hands-on experience in Georgia Tech's state-of-the-art electronics and nanotechnology core facilities. Participants will work with Georgia Tech faculty and students on projects in:

- Machine learning
- Surface mounting of electrical components
- Electrical characterization
- Optical inspection of features in a panel

**June 13 - July 22, 2022**

**Monday - Friday, 9 a.m. - noon**

**Application deadline: May 1, 2022**

At the conclusion of the program, participants will give a presentation on their project. They will also receive a certificate of participation.
